## TO THE EIGHTEENTH VOLUME, OR THE THIRD OF THE NEW SERIES.

	Page		Page
<b>A</b> BORIGINES, American, consist of the Malayan and Tatarian races	187	Bernard's antisyphilitic tincture	99
Acid fumigations worse than useless to destroy contagion	139, 240	Bigelow, J. Dr. describes the plants around Boston	275
Air, inflammable, for lamps	414	Blindness, hereditary	75
Akerly, Samuel, Dr. describes the medical topography of the 3d military district	293, 405	Blue, how to dye	417
Akerly, Samuel, Dr. operates for stricture in the intestine rectum	402	Body, human, spontaneously burnt	88
Alkali, mineral, known to the Greek and Roman physicians	307, 308	Botany of South-Carolina and Georgia	416
Alkaline remedy for lues	99	Botany of the United States	62
Amputation of the foot	90	Botany of the Missouri	137
Amputation of the arm at the shoulder	95, 342	Botany, new arrangement of	197
Amputation of the leg at the knee	99	Botany, American, important works on	275, 276, 277, 280
Anatomy, comparative, recommended	58	Bouriat, B. F. Dr. inquiries into the disease caused by rabid bites	375
Anatomy, publications on	414	Boyer, Baron, on surgical diseases	97, 206, 347
Aneurism relieved by ice	91	Bradbury, J. Mr. describes the plants near the Louisiana lead-mines	135
Aneurism, carotid, operation on	412	Button-snake-root, its virtues	412
Animals, domestic, their diseases	58	Cæsarean operation by the vagina	388
Animals, their natural history	415	Calcareous substances raised by coughing	180
Antiquities, American	188	Calculus peripneumonia	179
Antisyphilitic tincture	99	Caillot, L. Dr. his misrepresentations about yellow fever	327
Asylum, grand, for maniacs	267	Caverns containing human bones	188
Atlantic ocean, its ice-islands	101	Campaigns, medical sketches of	356
Atmosphere, violent commotion of	190	Celsus prescribes carbonated soda	308
Bailly, V. Mons. his mistakes about yellow fever	324	Character, medical, eulogized	203
Balls, death by wind of	100	Climate of the United States affected by Greenland ice	101, 305
Bascom, J. Dr. on winter fever	15	Clinton, De Witt, Dr. his philosophical discourse	206
Bartlett, L. Dr. describes hydrophobia by contact	383	Coasting vessels breed fevers	251
Bell, B. Dr. treatise on gonorrhœa	51		

	Page		Page
Cold, supposed increase of	253	Elliot, Stephen, Mr. addresses	
Cold of June and July, 1816	304	the philosophical society of	
Colica pictorum from sugar		South-Carolina	61
of lead	64, 358	Elliot, Stephen, Mr. publishes	
College of physicians at New-		a botanical sketch of Caro-	
York, its plan of education	104	lina and Georgia	416

	Page		Page
Gratz, Mr. furnishes ancient American fabrics	188	Lathrop, M. D. relates a cure of ovarian dropsy	292
Green, J. Mr. discourses on American botany	62	Laudanum efficacious in lock-jaw	122
Hare, R. Dr. his economical chemistry	414	Lead, acetated, produces colic	64, 358
Hamersley, W. Dr. writes on foxglove in phthisis	118	Lead-mines of Louisiana	135
Havanna, its yellow fever destroys Dr. Valli	369	Lefort, M. P. Dr. refutes again the idle fumigations by mineral acids	139, 240
Hazeltine, R. Dr. describes winter fever	25	Lefort, M. P. Dr. his doctrine of yellow fever examined	329
Hereford, T. P. Dr. on the winter epidemic	110	Legislature of New-York endows a lunatic asylum	268
Hernia, remarkable case of	281	Liatris spicata, its history	412
Heustis, J. W. Dr. describes the sickness among the troops below New-Orleans	33	Life, how to prolong	311
Heustis, J. W. Dr. makes observations on tetanus	122	Lobstein on the tonic and stimulant effects of phosphorus	205
Hippocrates knew the use of carbonated soda	307	Long-Island, its medical topography	297
Hosack, D. Dr. prepares an edition of Thomas's practice	163	Lunacy, methods of relieving	262
Hosack, D. Dr. inquires into the propagation of diseases by contagion	168	Madness, considerations on	261
Huntt, H. Dr. describes the bad effects of acetated lead	64	Malays migrate to America	187
Hydrogenous air used for light	414	Malone, catarrhal fever of	222
Hydrophobia not from rabid dogs	91, 383	Mann, J. Dr. writes medical sketches of the campaigns	356
Hydrophobia, practical writings on	375	Martin, E. Dr. writes the history of a blind family	75
Ice relieves aneurism	92	Martin E. Dr. describes the winter epidemic east of the Chesapeake	105, 172
Ice of Greenland overspreading the northern Atlantic	101, 305	Maryland, its epidemic fever	172
Inoculation for plague, its utility	368	Mease, J. Dr. gives lectures on comparative anatomy	58
Insanity, interesting views of	261	Medical science, its progress	310
Institute of New-York	312, 418	Medicines how prepared	269
Intestinum rectum, stricture of	399	Mind, great efforts making at New-York to cure its diseases	267
Jurisprudence, medical, importance of	288	Memory twofold	185
Kemp, Rev. Dr. visits a blind family	76	Missouri mineralogy and botany	135
Kercheval, L. Dr. describes omentitis	68	Mitchell, T. D. Dr. describes some remarkable occurrences at the Philadelphia Lazaretto	248
Kerr, J. Dr. writes on the winter fever	211	Mitchill, Dr. continues to collect the facts concerning ice at and beyond Newfound-land	101, 305
King, J. Dr. performs the cesarian operation by the vagina, and delivers a living infant	391	Mitchill, Dr. produces further proof of the Malayan and Tatarian descent of the Americans	197

	Page		Page
Mitchill, Dr. witnesses a sporadic malignant fever with black vomit	81	Partial amputation of the foot	90
Moseley, B. Dr. his practice in hydrophobic cases	375	Pascalis, F. Dr. records a case of perforated stomach	287
Mummy of Kentucky, description and figure of	189	Pascalis, F. Dr. makes remarks on late European books and proceedings in relation to yellow fever and contagion	313
Muriatic acid gas does not destroy contagion, or purify infected air	145, 240	Peach-tree, diseases of	199
Mother and infant both saved by the cæsarean operation	391	Peach-tree, mode of preserving	200
Morse, J. O. Mr. describes the mineralogy of Cherry-Valley	420	Petrifications, curious	420
Natchez, winter epidemic at	211	Pestilential distempers, discussion about	168
Nature, analysis of	195	Pharmacopœia of the New-York hospital	205, 268
Navigation endangered by ice-islands	102	Philadelphia lazaretto, its diseases	248
Negroes, their obi	413	Phelps, J. Dr. and Spalding, L. Dr. their case of hernia (with figures)	281
New-York, weather and diseases of	80, 86, 190, 195, 301, 307, 408	Phosphorus internally given	205
New-York university and medical school	104, 312	Physicians eulogized	203
New-York hospital, its pharmacopœia	205, 268	Placenta injected by the umbilical vein	96
New-York literary and philosophical society's transactions, &c.	206, 312	Plague, attempts to inoculate	362
New-York hospital, its additional accommodation for lunatics	267	Plica polonica	86
New-York com. council, their munificence to literature, science, and the arts	312, 418	Post, W. Dr. operates for carotid aneurism	412
New-York, its medical topography	293, 406	Preaching, missionary, in Naples	89
New-York, its gas-light experiment	414	Prescriptions, medical, how to make	268
New-York, its institute	418	Pursh, F. Mr. compiles a flora of North-America	277
Nitre of the ancients is the carbonated soda of the moderns	307, 308	Quakers, a sketch of their habits and discipline	260
Nitrous vapour, false allegations in its favour	241	Quicksilver, bad consequences of its injudicious administration	358
Nose, worms issuing from	182	Rafinesque, C. S. Mr. publishes an analytical view of nature	195
Obi, its mischief to relieve	412	Rafinesque, C. S. Mr. circulates an address containing extensive views of natural objects	309
Ocean, North Atlantic, its vast quantities of floating ice	101	Remarks on the winter epidemic	1, 5, 209, 211
Omentitis, fatal	68	Remedies for tetanus	230
Operations, see <i>surgery</i> .		Remedies, how to prepare	270
Origin of the American tribes	187	Review of Dyckman's dissertation on the humoral pathology	42
Origin of the cotton fever	250	Review of Comstock's essay on febrile diseases	49
Ovarian dropsy cured	292

	Page		Page
Review of the Albany edition of B. Bell's treatise on virulent gonorrhœa	51	Rich, O. Mr. forms a generic synopsis of North-American plants	276
Review of Mease's introductory lecture to his course of veterinary medicine, &c.	58	Rice, wild, of the Lakes	417
Review of Elliot's address to the literary and philosophical society of S. Carolina	61	Roper, T. W. Dr. describes a very uncommon tumour	71
Review of Green's address to the New-York society of arts, on the botany of the United States	62	Rucco, J. Dr. publishes on the prolongation of life	311
Review of Gallup's epidemics of Vermont	149	Sandy-Hook, its medical topography	293
Review of the New-York edition of Thomas's practice	163	Sarcoma, enormous	72
Review of Martin's essay on the winter epidemic of Maryland	172	Scott, J. G. Dr. on the winter epidemic	114
Review of Wilson's inquiry into the nature and treatment of spotted fever	253	Schaeffer, Rev. F. C. on sickly peach-trees	199
Review of the Philadelphia edition of Tuke's institution for maniacs	259	Seaman, V. Dr. publishes a discourse on vaccination	309
Review of the pharmacopœia of the New-York hospital	268	Season, peculiar, of 1816	301
Review of Bigelow's florula of plants near Boston	275	Shoulder, amputation at	93, 342
Review of Rich's genera of American vegetables	276	Silver, nitrated, good in epilepsy	356
Review of Pursh's flora of North-America	277	Singleton, W. Dr. on the epidemical influenza in Virginia	226
Review of Correa's reduction of Muhlenburg's genera to the nat. families of Jussieu	280	Skeleton, human, petrified	96
Review of Stevens's translation of Boyer's surgical diseases	347	Sleep, curious effect of, on memory	185
Review of Mann's medical sketches of the campaigns of 1812, 13, and 14	356	Soda, carbonated, known as a remedy by Hippocrates	307
Review of Valli's journal of the plague at Constantinople, 1803	362	Solar spots of 1816	303
Review of Moseley's dissertation on canine madness	375	Southampton, Virginia, its epidemic	226
Review of Bouriat's reflections on rabies, its prevention and cure	375	Spotted fever, inquiry into	149, 253
Ribes and Claubry, Mess. their report on extirpating the arm at the shoulder	342	Staten-Island, its medical topography	296
		Stevens, A. H. Dr. translates Boyer's treatise on surgical diseases	206, 347
		Stomach, perforated	287
		Stones, expectorated	179
		Storm, terrible, in New-England	190
		Stricture of the rectum	401
		Surgery—Partial amputation of the foot, 90—Aneurism treated by ice, 91—Amputation of the arm at the shoulder, 93—Discourses on wounds, 99—Hernia of the bladder and intestine, 281—Humeral amputation, 342—Treatise on surg. diseases, 347—Discussions on gunshot wounds, 361—Cæsare-	

	Page		Page
an operation <i>per vaginam</i> , 388—Operation for strictured rectum, 402; for carotid aneurism, 412		Vagina, incision through, to let out an extra-uterine fœtus	390
Sweating of one side	184	Vermont, its epidemic	149
Tatars migrate to America	187	Waterhouse, H. S. Dr. on the catarrhal fever	222
Terre-aux-Bœufs, mortality at	33	Weather, phenomena of	81, 91, 301, 408, 411
Tetanus and lock-jaw, remarks on	122, 229	Willey, A. C. Dr. on conception	335
Thomas, R. Dr. New-York edition of his modern practice of physic	163	Wilson, J. Dr. inquires into spotted fever	253
Tincture, alkaline, against pox	99	Winter epidemics	1, 15, 19, 25, 105, 108, 110, 113, 114, 211, 214, 222, 226, 253
Tobacco relieves strictured rectum	400, 403	Woad, or pastel, cultivation of	417
Topography, medical, of New-York and its environs	293, 406	Worms discharged from the nose	181
Trent, J. Dr. writes on the winter epidemic	108	Wounds, discourses on	106
Tuke, Samuel, on the regimen of lunatics	259	Yellow fever, sporadic case of	81
Tumour, very extraordinary, (with a figure)	73	Yellow fever, opinions concerning	167
Tumour, hernial, dissection of	283	Yellow fever, historical inquiry into	313
Tumour, gastric, dissected	290	Yellow fever, review of the controversy about	321
Universe, picture of	176	Yellow fever, mistakes concerning, in European books	324
Urine, suspended secretion of	176	Yellow fever, erroneous notions of, industriously propagated	332
Utley, V. Dr. relates a remarkable case	176	Yellow fever terminates the life of Dr. Valli, at Havanna	369
Vaccination, progress of	419	Yellow fever not contagious	370
Vaccination, discourse on	309	Zoology, great improvement in	415
Vaccine establishment of London	301	Zoology, <i>vide</i> preface.	
Valli, E. Dr. his adventures and death	362	Zoological museum	418
Vaughan, B. Dr. on winter fever	19	Zizania, an excellent grain	417
